WORLD REWILDING DAY 2023

MARCH 20

#RewildingHope

There has never been a better time to get involved in rewilding! Rewilding is about letting nature take care of itself, enabling natural processes to shape land and sea, repair damaged ecosystems and restore degraded landscapes.

World Rewilding Day was launched in 2021 by the Global Rewilding Alliance. On March 20, it will see rewilding initiatives and people from six continents come together again to raise awareness of rewilding and the need for nature recovery around the globe.

This year's event will focus on the hope that rewilding offers to both nature and people.
